

Environmental Sustainability Statement

B19 Motor Club is committed to the protection of the environment, reducing the detrimental impact of its events on the environment, and improving the sustainability of motorsport in the UK. We ask for everyone's support in this, and ask you to follow these actions to manage these significant environmental aspects during any event we organise, and in which you take part.

- **Waste:** We make every effort to eliminate or reduce waste from all events and ask you to do the same. Please avoid printing unnecessarily

Be aware that livestock and other people use the venues we use, so avoid leaving any waste, including biodegradable food and cigarette butts. We need to act with respect to the landowners to retain their support for future events. . Do not leave any type of waste at the venue or en-route. Please take all your waste home to recycle whenever possible, or to dispose of in the approved manner.

- **Noise:** Motorsport UK legal noise levels are required at all times unless a lower level is specified in supplementary regulations. If the noise of your vehicle is found to be excessive by the organisers, you will be either asked to reduce noise to acceptable levels, or eliminated from the event depending on the circumstances. Please drive considerately whenever on the public road and in sensitive areas when approaching or exiting event venues.
- **Land, Water and Air Protection:** We must protect the event sites, and routes, from environmental damage. Measures taken to reduce land damage include consideration of the weather conditions, event layouts and permitted tyres.

B19 Motor Club event regulations include details of the tyres permitted to be used. Organisers have the authority to decline the use of any tyres that do not comply with the rules set out in the supplementary regulations.

If spillage of any quantity of hazardous liquid/material occurs, use a spill kit/drip tray quickly. Any such spillage to be reported immediately to the B19 organisers. We strongly recommend the use of ground sheets for all competitors in paddock areas, together with the carrying of spill kits.

We strongly recommended to avoid refuelling at events. If refuelling is required, it should only be done with appropriate measures in place to avoid any spillages.

Whilst emissions testing is not undertaken at events, if your vehicle is deemed by the organisers to have excessive emissions you will be asked to reduce emissions to acceptable levels.

- **Environmental Awareness:** B19 Motor Club aims to promote environmental sustainability as widely as possible, to our members, our friends, associated organisations within Motorsport, and to the public. We encourage you to spread the word about what we are doing and share any ideas to further improve environmental sustainability.
